7th International Conference

FIBRE CONCRETE 2013

Technology, Design, Application

September 12-13, 2013
DAP Hotel, Prague, Czech Republic

Invitation to the Conference

Fibre Concrete 2013 is an international conference focused on fibre reinforced concretes traditionally held biennially. The objective of the conference is to offer a basis for the presentation and discussion of the recent knowledge in theory, design and use of fibre composites in concrete structures. The results of experimental research, new materials development, progress in analytical methods and their implementation in design will be presented. Successful applications of fibre reinforced concrete in structures and executions of FRC structural elements and structures will be demonstrated. The conference aims at getting together specialists from different spheres – research, development, technology and applications of concrete, designers and building industry enterprisers.

It is a great pleasure for me to invite you to this Conference on behalf of the Conference Organizers.
